

Spack E4S

Working Group Outbrief

Scalable Tools Workshop 2025

Action Items

- Spack needs to preserve and extract debug information
 - Discuss with Spack team for how to make this happen
 - Goal is to split DWARF from binaries during `spack install`
- Consider extending DWARF to make source prefix variable
 - GCC/Clang has `-ffile-prefix-map=OLD=NEW` but not quite enough, needs to be variable
-
